Subject: Microsoft Settlement

To whom concerned,

I believe that the proposed Federal Court Settlement regarding the alleged Microsoft wrongdoing is fair and proper. I also believe that the states choosing to withhold their support are doing so only in pursuit of monetary gains not justified by the accusations. It is my belief that, at this point in history, our Justice Department has far more pressing items to occupy it's time than to interfere in the business practices of any of our most valued companies.

Sincerely,

Terrell E. Dailey
